

## Westlake Chemical Partners LP Announces First Quarter 2025 Results

May 2, 2025

- Declared quarterly distribution of \$0.4714 per unit; 43<sup>rd</sup> consecutive quarterly distribution

HOUSTON--(BUSINESS WIRE)-- Westlake Chemical Partners LP (NYSE: WLKP) (the "Partnership") today reported net income attributable to the Partnership in the first quarter of 2025 of \$4.9 million, or \$0.14 per limited partner unit, which was below first quarter 2024 net income of \$14.8 million. Cash flows from operating activities in the first quarter of 2025 were \$45.8 million, a decrease of \$58.8 million compared to first quarter 2024 cash flows from operating activities of \$104.6 million, due to lower production and sales volume as the result of the planned Petro 1 turnaround. For the three months ended March 31, 2025, MLP distributable cash flow was \$4.7 million, a decrease of \$12.2 million compared to first quarter 2024 MLP distributable cash flow of \$16.9 million. The decrease in MLP distributable cash flow and associated trailing twelve-month coverage ratio was primarily due to lower production and sales volume and higher maintenance capital expenditures as a result of the planned Petro 1 turnaround.

Compared to the fourth quarter of 2024, first quarter 2025 net income attributable to the Partnership of \$4.9 million decreased by \$10.1 million, which was in line with our expectation considering the impact of the planned Petro 1 turnaround. First quarter 2025 cash flows from operating activities of \$45.8 million decreased by \$86.7 million compared to fourth quarter 2024 cash flows from operating activities of \$132.5 million due to the Petro 1 turnaround. First quarter 2025 MLP distributable cash flow of \$4.7 million decreased by \$10.3 million compared to fourth quarter 2024 MLP distributable cash flow of \$15.0 million, due to lower production and sales volume and higher maintenance capital expenditures as a result of the planned Petro 1 turnaround.

"As expected, our first quarter of 2025 distributable cash flow and associated coverage ratio were negatively impacted by the planned turnaround at our Petro 1 ethylene facility in Lake Charles, Louisiana. The turnaround began at the end of January, as expected, and extended into early April. Importantly, Petro 1 returned to full operating rates last month and has been operating well ever since," said Jean-Marc Gilson, President and Chief Executive Officer. "I would like to thank all of our employees at Petro 1 who contributed to the successful turnaround and the solid operational track record of Petro 1 since its previous turnaround over 8 years ago. The achievement to go over 8 years between turnarounds is a significant milestone and highlights our strong operating and manufacturing culture. With the Petro 1 turnaround behind us, and no further turnarounds planned for several years, we expect our distributable cash flow and coverage ratio to return to our strong historical levels in coming quarters."

On April 30, 2025, the Partnership announced that the Board of Directors of Westlake Chemical Partners GP LLC had approved a quarterly distribution for the first quarter of 2025 of \$0.4714 per common unit to be payable on May 29, 2025 to unitholders of record as of May 13, 2025, representing the 43<sup>rd</sup> consecutive quarterly distribution to our unitholders. MLP distributable cash flow provided trailing twelve-month coverage that was 0.82x the declared distributions for the first quarter of 2025, which was below the trailing twelve-month coverage ratio of 1.01x at the end of the fourth quarter of 2024 due to the planned Petro 1 turnaround. Since our IPO in July of 2014 our cumulative coverage ratio is approximately 1.06x.

OpCo's Ethylene Sales Agreement with Westlake is designed to provide for stable and predictable cash flows. The agreement provides that 95% of OpCo's ethylene production is sold to Westlake for a cash margin of \$0.10 per pound, net of operating costs, maintenance capital expenditures and reserves for future turnaround expenditures.

*The statements in this release and the related teleconference relating to matters that are not historical facts, such as those with respect to timing of future turnarounds, results of our completed Petro 1 turnaround on future distributable cash flow and coverage ratio, our outlook for third-party ethylene margins, our expectations regarding feedstock and energy costs, our expectations regarding future interest rates, the ability to deliver value, returns, predictable cash flows and distributions to unitholders, the expectation that strong distributions will continue, and the nature of the sales agreement with Westlake, are forward-looking statements. These forward-looking statements are subject to significant risks and uncertainties. Actual results could differ materially, based on factors including, but not limited to, pandemic infectious diseases and the response thereto; operating difficulties; the volume of ethylene that we are able to sell; the price at which we are able to sell ethylene; changes in the price and availability of feedstocks; changes in prevailing economic conditions; actions and commitments of Westlake Corporation; actions of third parties; inclement or hazardous weather conditions, including flooding, and the physical impacts of climate change; environmental hazards; changes in laws and regulations (or the interpretation thereof); inability to acquire or maintain necessary permits; inability to obtain necessary production equipment or replacement parts; technical difficulties or failures; labor disputes; difficulty collecting receivables; inability of our customers to take delivery; fires, explosions or other industrial accidents; our ability to borrow funds and access capital markets; and other risk factors. For more detailed information about the factors that could cause actual results to differ materially, please refer to the Partnership's Annual Report on Form 10-K for the year ended December 31, 2024, which was filed with the SEC in March 2025.*

*This release is intended to be a qualified notice under Treasury Regulation Section 1.1446-4(b). Brokers and nominees should treat one hundred percent (100.0%) of the Partnership's distributions to non-U.S. investors as being attributable to income that is effectively connected with a United States trade or business. Accordingly, the Partnership's distributions to non-U.S. investors are*

subject to federal income tax withholding at the highest applicable effective tax rate.

#### Use of Non-GAAP Financial Measures

This release makes reference to certain "non-GAAP" financial measures, such as MLP distributable cash flow, coverage ratio and EBITDA. For this purpose, a non-GAAP financial measure is generally defined by the Securities and Exchange Commission ("SEC") as a numerical measure of a registrant's historical or future financial performance, financial position or cash flows that (1) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the registrant; or (2) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. We report our financial results in accordance with U.S. GAAP, but believe that certain non-GAAP financial measures, such as MLP distributable cash flow, coverage ratio and EBITDA, provide useful supplemental information to investors regarding the underlying business trends and performance of our ongoing operations and are useful for period-over-period comparisons of such operations. These non-GAAP financial measures should be considered as a supplement to, and not as a substitute for, or superior to, the financial measures prepared in accordance with U.S. GAAP. We define MLP distributable cash flow as distributable cash flow less distributable cash flow attributable to Westlake Corporation's noncontrolling interest in OpCo and distributions attributable to the incentive distribution rights holder. MLP distributable cash flow does not reflect changes in working capital balances. We define EBITDA as net income before interest expense, income taxes, depreciation and amortization. MLP distributable cash flow, coverage ratio and EBITDA are non-GAAP supplemental financial measures that management and external users of our consolidated financial statements, such as industry analysts, investors, lenders and rating agencies, may use to assess our operating performance as compared to other publicly traded partnerships, our ability to incur and service debt and fund capital expenditures and the viability of acquisitions and other capital expenditure projects and the returns on investment of various investment opportunities. Reconciliations of MLP distributable cash flow to net income and to net cash provided by operating activities and of EBITDA to net income, income from operations and net cash provided by operating activities can be found in the financial schedules at the end of this press release.

#### Westlake Chemical Partners LP

Westlake Chemical Partners is a limited partnership formed by Westlake Corporation to operate, acquire and develop ethylene production facilities and other qualified assets. Headquartered in Houston, the Partnership owns a 22.8% interest in Westlake Chemical OpCo LP. Westlake Chemical OpCo LP's assets consist of three ethylene production facilities in Calvert City, Kentucky, and Lake Charles, Louisiana, and an ethylene pipeline. For more information about Westlake Chemical Partners LP, please visit <http://www.wlkpartners.com>.
