

Westlake Chemical Partners LP Announces Fourth Quarter Earnings

February 24, 2015

HOUSTON, Feb. 24, 2015 /PRNewswire/ -- Westlake Chemical Partners LP (NYSE: WLKP) (the "Partnership") today reported fourth-quarter 2014 net income attributable to the Partnership of \$8.6 million, or \$0.32 per limited partner unit, and MLP distributable cash flow of \$8.5 million for its first full quarter of operations. For the 2014 post IPO period from August 4, 2014 through December 31, 2014 (the "Post IPO Period"), net income attributable to the Partnership was \$13.6 million, or \$0.50 per limited partner unit, and MLP distributable cash flow for the Post IPO Period was \$13.8 million.

Net sales for the fourth quarter of 2014 was \$273.5 million. For the Post IPO Period, net sales were \$445.1 million. The Partnership's sales agreement with Westlake Chemical Corporation is designed to provide for stable and predictable cash flows. The sales agreement provides that 95% of the Partnership's ethylene production is sold to Westlake Chemical Corporation providing a cash margin of \$0.10 per pound, net of operating costs, maintenance capital expenditures and reserves for future turnaround expenditures.

On January 30, 2015, the Board of Directors of Westlake Chemical Partners GP LLC, the general partner of the Partnership, declared a quarterly distribution of \$0.275 per unit to be payable on February 24, 2015 to the unitholders of record on February 9, 2015. The Post IPO Period MLP distributable cash flow provided coverage of 1.15x the declared distributions.

"We are pleased to report a successful first full quarter of operations for Westlake Chemical Partners. As a result of the long-term ethylene sales agreement with our sponsor, 95% of our sales are not subject to the volatility in the oil and ethylene markets and provide for a stable cash margin of \$0.10 per pound of ethylene sold to our sponsor. We believe that the stability of the cash flows generated by our business, along with multiple growth opportunities provide us the ability to generate long-term growth and value to our unitholders," said President and Chief Executive Officer Albert Chao.

BASIS OF FOURTH QUARTER RESULTS

Results of operations for the year of 2014 include results of the Partnership's predecessor from January 1, 2014 through August 3, 2014, and operations of the Partnership from August 4, 2014 (the closing date of the Partnership's initial public offering, or IPO) through December 31, 2014. Because results presented for periods prior to the IPO do not factor into MLP distributable cash flow, this earnings release focuses on results of operations for the Post-IPO period in 2014.

The statements in this release and the related teleconference relating to matters that are not historical facts, but forward-looking statements, including the amount of ethane that we are able to process, which could be adversely affected by, among other things, operating difficulties; the volume of ethylene that we are able to sell; the price at which we are able to sell ethylene; changes in the price and availability of electricity; changes in prevailing economic conditions; unanticipated ground, grade or water conditions; inclement or hazardous weather conditions, including flooding, and the physical impacts of climate change; environmental hazards; industrial accidents; changes in laws and regulations (or the interpretation thereof); inability to acquire or maintain necessary permits; inability to obtain necessary production equipment or replacement parts; technical difficulties or failures; labor disputes; late delivery of raw materials; difficulty collecting receivables; inability of our customers to take delivery; changes in the price and availability of transportation; fires, explosions or other accidents; our ability to borrow funds and access capital markets; and other risk factors. For more detailed information about the factors that could cause actual results to differ materially, please refer to the Partnership's Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2014, which was filed with the SEC on November 7, 2014

Use of Non-GAAP Financial Measures

This news release includes the term MLP distributable cash flow, which is a non-GAAP financial measure, as defined in Regulation G of the U.S. Securities Exchange Act of 1934, as amended. We report our financial results in accordance with U.S. generally accepted accounting principles ("GAAP"), but believe that certain non-GAAP financial measures, such as MLP distributable cash flow, provide useful supplemental information to investors regarding the underlying business trends and performance of our ongoing operations and are useful for period-over-period comparisons of such operations. These non-GAAP financial measures should be considered as a supplement to, and not as a substitute for, or superior to, the financial measures prepared in accordance with GAAP. A reconciliation of MLP distributable cash flow to net income and net cash provided by operating activities can be found in the financial schedules at the end of this release. We define distributable cash flow as net income plus depreciation and amortization, less contributions from turnaround reserves and maintenance capital expenditures. We define MLP distributable cash flow as distributable cash flow attributable to periods subsequent to the date of our initial public offering less distributable cash flow attributable to Westlake Chemical Corporation's noncontrolling interest in Westlake Chemical OpCo LP, because MLP distributable cash flow may be defined differently by other companies in our industry, our definition of MLP distributable cash flow may not be comparable to similarly titled measures of other companies.

Westlake Chemical Partners is a limited partnership formed by Westlake Chemical Corporation to operate, acquire and develop ethylene production facilities and other qualified assets. Headquartered in Houston, Texas, the Partnership owns a 10.6% interest in Westlake Chemical OpCo LP. Westlake Chemical OpCo LP's assets consist of three ethylene production facilities in Calvert City, Kentucky, and Lake Charles, Louisiana, and an ethylene pipeline.
